DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

Notice of Intent To Prepare a Supplemental Environmental Impact Statement for the Matagorda Ship Channel Improvement Project, Calhoun and Matagorda Counties, TX

AGENCY: Corps of Engineers, Department of the Army, DoD.

ACTION: Notice of intent to prepare a draft supplemental environmental impact statement for the Matagorda Ship Channel Improvement Project, Calhoun and Matagorda Counties, TX.

SUMMARY: The Galveston District, U.S. Army Corps of Engineers (USACE) intends to prepare a Draft Supplemental Environmental Impact Statement (SEIS) for the Matagorda Ship Channel Improvement Project consistent with the National Environmental Policy Act of 1969 (NEPA). On April 22, 2020, the Record of Decision (ROD) was signed for the Matagorda Ship Channel Improvement Project (MSCIP), Calhoun and Matagorda Counties, TX Final Integrated Feasibility Report and Environmental Impact Statement (IFR–EIS). During the pre-construction engineering and design (PED) phase, the USACE identified a discrepancy between its PED calculations concerning the quantity of material to be dredged from the Matagorda Ship Channel and the quantity of such material that was evaluated in the IFR–EIS. Due to the discrepancy, the USACE determined a SEIS would be prepared, and the ROD dated April 22, 2020, was withdrawn for further consideration of findings in the SEIS. In accordance with the Council on Environmental Quality regulations, the USACE will prepare a SEIS to document and disclose the impacts of substantial changes to the proposed action and new information that are relevant to environmental concerns. This notice also announces the USACE intent to seek public input on the scope of the SEIS, information, or topics to be addressed, and public concerns surrounding the proposed action.

DATES: Public scoping comments should be submitted on or before July 3, 2023, electronically or mailed as written letters. One public scoping meeting will be held on June 7, 2023, from 6:00 p.m. to 8:00 p.m. at the Bauer Exhibit Hall in Calhoun County, 166 Henry Barber Way, Port Lavaca, TX 77979.

ADDRESSES: Submit all electronic public comments via Submittal to Dr. Raven Blakeway: MSC_SEI@usace.army.mil. Written comments may be mailed to U.S. Army Corps of Engineers, Galveston District, ATTN: Dr. Raven Blakeway, P.O. Box 1229, Galveston, TX 77553–1229.

SUPPLEMENTARY INFORMATION:

1. Authority. The Matagorda Ship Channel Improvement Project (MSCIP) study described in the Final Integrated Feasibility Report and Environmental Impact Statement (IFR–EIS) was authorized under section 216 of the Flood Control Act of 1970 (Pub. L. 91–611) and original construction was authorized under section 101 of the Rivers and Harbors Act of 1958 (Pub. L. 85–500). Section 216 authorizes the USACE to review a completed navigation, flood risk reduction, water supply, or related project due to significantly changed physical or economic conditions, and to report to Congress with recommendations regarding modification of the project’s structures or operation, and for improving the quality of the environment in the overall public interest. Modifications to the original project were proposed in the IFR–EIS and the project was authorized for construction in the Water Resources Development Act of 2020 (Pub. L. 116–260). The lead agency for this action is the USACE and the non-federal sponsor is the Calhoun Port Authority (CPA).

2. Background. The purpose of the proposed action is to reduce transportation costs and increase operational efficiencies of maritime commerce movement while providing for safe, reliable navigation of the Matagorda Ship Channel (MSC). The current channel dimensions are incapable of accommodating the forecasted commodity and fleet growth without significant and system-wide inefficiencies. By expanding channel dimensions, cargo vessels could reduce or eliminate light loading measures, and larger cargo vessels unable to transit the existing channel configuration could begin using the Port of Port Lavaca (herein the Port) and adjacent facilities.
