Recommendations for Effective NSCHC Policy & Procedures

Office of Monitoring

Effective May 1, 2021

Document Overview:

When conducting a compliance assessment for NSCHC, the AmeriCorps Office of Monitoring will request and review a copy of an organization's adopted NSCHC policy and procedures. While AmeriCorps regulations at 45 CFR do not explicitly require that grantees have a policy, it is strongly recommended that programs create and maintain clear, written expectations for their NSCHC process, as appropriate to their organization's needs.

Policies and procedures can help organizations ensure compliance with laws and regulations, give guidance for decision-making, and streamline internal processes. It is an organizational best practice to have comprehensive, written NSCHC policy, procedures, guidance, or practices (henceforth referred to as "policy" in this document).

An effective policy will incorporate the procedural steps required by those responsible for conducting NSCHC and will identify how an organization's existing tools and systems will support the maintenance of adequate documentation related to NSCHC grant records. A checklist of recommended elements to include in NSCHC policy is below.
